# INSTITUTE VISION & MISSION

## **VISION:**

To create a vibrant knowledge oriented environment with innovative teaching practices and to inculcate a tradition of socially conscious application of technology.

## **MISSION:**

- To inculcate a culture of value based education.
  - To enthuse students to develop in an ambient environment of caring and of sharing information. ●
- To enable students to work towards excellence in their chosen field with a professional bent of mind.

## COMPUTER ENGINEERING DEPARTMENT

## **VISION:**

To reach international standards by empowering students with Computing skills and cutting edge technology

## **MISSION:**

- To sustain excellence in teaching and research and create center of excellence
- To provide broad Educational and Research experiences through interdisciplinary and industrial collaboration programs.
- To prepare students to enter the world of computing and make them ready for productive employment in the public or private sectors, enhance their entrepreneurship skills and motivate them to pursue advanced degrees.

### PROGRAM EDUCATIONAL OBJECTIVES (PEO's)

|     |  |
|-----|--|
| I   | To provide students with a solid foundation in their core concepts of mathematical, scientific and computer engineering fundamentals required to comprehend, analyze and design solutions for real life problems.        |
| II  | To inculcate in students, a balanced outlook with professional and ethical attitude, develop effective communication skills, teamwork and leadership qualities with multidisciplinary approach.                          |
| III | To prepare students to excel in postgraduate programs through an excellent academic environment and make them ready for productive employment in the public or private sectors and provide lifelong learning experience. |
| IV  | To provide broad educational and research experience through interdisciplinary and industry centric programs.  |

### PROGRAM OUTCOMES (POs)

| <b>Program Outcome Code</b> | <b>Program Outcome Description</b>  |
|-----------------------------|---|
| PO1                         | Basic Engineering knowledge: An ability to apply the fundamental knowledge in mathematics, science and engineering to solve problems in Computer engineering.   |
| PO2                         | Problem Analysis: Identify, formulate, research literature and analyze computer engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences and computer engineering and sciences |

|     |  |
|-----|--|
| PO3 | Design/ Development of Solutions: Design solutions for complex computer engineering problems and design system components or processes that meet specified needs with appropriate consideration for public health and safety, cultural, societal and environmental considerations. |
| PO4 | Conduct investigations of complex engineering problems using research-based knowledge and research methods including design of experiments, analysis and interpretation of data and synthesis of information to provide valid conclusions.   |

|      |   |
|------|---|
| PO5  | Modern Tool Usage: Create, select and apply appropriate techniques, resources and modern computer engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.  |
| PO6  | The Engineer and Society: Apply reasoning informed by contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to computer engineering practice.   |
| PO7  | Environment and Sustainability: Understand the impact of professional computer engineering solutions in societal and environmental contexts and demonstrate knowledge of and need for sustainable development.  |
| PO8  | Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of computer engineering practice.   |
| PO9  | Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams and in multidisciplinary settings.  |
| PO10 | Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations and give and receive clear instructions. |
| PO11 | Project Management and Finance: Demonstrate knowledge and understanding of computer engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.  |

|      |   |
|------|---|
| PO12 | Life-long Learning: Recognize the need for and have the preparation and ability to engage in independent and lifelong learning in the broadest context of technological change. |
|------|---|

### **PROGRAM SPECIFIC OUTCOMES (PSOs)**

|      |   |
|------|---|
| PSO1 | <b>Professional Skills</b> - The ability to develop programs for computer based systems of varying complexity and domains using standard practices.   |
| PSO2 | <b>Successful Career</b> - The ability to adopt skills, languages, environment and platforms for creating innovative career paths, being successful entrepreneurs or for pursuing higher studies. |
